| PART 3: | In this part of the survey you are asked to fill in the context class (if any), the subject and object class. Also, you need to select among the options for the qualifier and the relation. Feel free to be inventive and fill in the name of the classes that you think would fit best for their representation in the AIDA sentence, without checking if the class exists or not. Tip: filling in first the qualifier and the relation might help to choose afterwards the names of the context, subject and object classes. | |
